West Side Mission.

Evangelist Miss Lewis of Vernon county, accompanied by Mr. Benton of New York and Mr. Gillen of Fairfield, Wis., spoke at the Mission Monday evening, July 15. There was a large audience and a very appreciative crowd. The public is cordially invited and the meetings every night at 8 o'clock.

Chance for Young Men.

Congressman Morse of this district has received notice from the Navy Department that he will be allowed to recommend for appointment a young man from the Tenth Congressional District. He believes that this excellent chance for an education at the expense of the government should not be given to some political favorite, but rather should be open to competition to all young men between the ages of 16 and 30 years, and if there are enough applicants for the position, he will hold an examination probably at Waupun or as near the center of the district as possible and he will recommend for this appointment the boy who scores the highest standing at this examination.

Athletics Win at Stevens Point.

What a surprise the Athletics did spring on those fellows at the Point. It was the Orioles too. The team that made the Athletics look like 300 down here the fore part of the season. They were so anxious to take another game from the rain. Nash, known as Puck among his friends, was on the firing line for the Athletics, one hit being registered off from him. Tells the story of his grand pitching. They got that in the fifth inning with a man on second, scoring their first run. The ball went over the outer corner of the third sack which shows how close he came to getting a no hit game.

THE WAR IS OVER.

The Lawyers, as Usual Take Everything in Sight Except the Receipts.

It is all over. There was nothing to it. The lawyers skinned the doctors by a score of 12 to 10 and the latter have not yet got thru telling how it all happened. The only thing that the lawyers did not take was the receipts at the gate, which the ladies had a first mortgage on and foreclosed before there was any chance for an argument.

Given a Promotion.

John Hancock, who has been in charge of the Wisconsin Central depot at this point during the past two years, has been promoted to the charge of the station at Manitowish, which is one of the best that the company has to offer.

Jackson Property Sold.

A deal was closed on Tuesday for which Geo. M. Hill and C. F. Kruger became the owners of the First Jackson property on the corner of Second and Third avenues. The consideration is private.

After Supper Sale

The 4th After Supper Sale

IS NOW ON SATURDAY NIGHT AT 7 P. M.

Almost unnecessary to advertise this event. It has already secured a following who have found that it pays to be on hand bright and early at these weekly merchandising events. Some of our best departments make liberal contributions of good merchandise for this week's sale and we didn't take the prices that they carried but made our own, for this After Supper sale event must give you goods at a lower valuation than you can buy them under any other circumstances.

A slow, old-time merchant would be horrified at the way we cut prices on the toboggan at these After Supper Sales. The After Supper Sales are certainly appreciated.

Sale Begins at 7 p. m. Saturday, July 27.

A few Specials that you will find in our After Supper Sale.

Mens 24 inch red or blue handkerchiefs, all fast color, regular 10c, After Supper Sale each.....**5c**

A Boys red or blue handkerchiefs regular 5c quality, after supper sale each.....**2c**

A large assortment of ladies' shirt waists in all sizes up to 42. These garments are of superior value and patterned in Val. lace and fine embroidery insertion, short and long sleeves, regular \$1.50 garments, after supper sale each.....**65c**

Womens gauze, sleeveless vests in full line of regular sizes, 15c values after supper sale each.....**7c**

Womens black hose full shaped sizes 8 1/2 to 19, regular 15c values after supper sale a pair.....**7c**

Womens gingham skirts, made with full two ruffled flounce, piped in white, a splendid value at our after supper sale.....**75c**

J. T. SCHUMACHER'S Cash Store

Wood County Real Estate Transfers.

August Prahl and wife of Vesper to Wm. A. Erdman, Wm. Heermann and Wm. Markwardt of Sheboygan on July 8th. W 1/2 NE 1/4 Sec. 8 T 24 N of R 4E. 80 acres. Consideration \$5000.

Edward A. Benson and wife and Chas. E. Anderson and wife to Jacob J. Typhens of Wood County on the 11th of June '07. NW 1/4 of Sec. 31 T 24 N of R 5E. Con. \$1400.00.

Geo. H. Welton and wife of Wood County to Fred E. Graham of the same county on the 17th of July. Part of NW 1/4 of Sec. 3 T 24 R 4E. 140 acres. Con. \$1,000.00.

Marlin Reathle and wife of Wood Co. to Robert Duthie of same place on June 8th. Part of SW 1/4 of SW 1/4 Sec. 26 T 25 N of R 5E. Con. \$1.00.

Stopped by the Rain.

The game between the Oshkosh team and the Tigers of this city was stopped on Sunday by the rain. The two teams played an inning and a half, during which time neither side scored a run, and then the rain started in and continued to fall until the grounds were flooded. There was a fairly good crowd in attendance considering the aspect of the weather, and these sought shelter wherever they could find it, many being drenched before they could reach home. It gave promise of being a good game, and baseball enthusiasts were greatly disappointed that it could not be played out.

Green Bay Here Thursday.

The Green Bay league team will be here on Thursday to play a game of baseball with the Tigers. If the Tigers are playing in good form it should be an interesting game and will no doubt draw out a large crowd. On Sunday the Merrill team will be in the city to play the locals and this should also prove a good game. The last game with the Merrill team resulted in a victory for the Merrill by a score of 3 to 6.

Challenge the Winners.

The postoffice employees have issued a challenge to the winners of yesterday's game, and the boys are of the opinion that they can clean out their opponents in a walk. If the game is played the proceeds will be for the benefit of the Federated clubs.

A Three Weeks Vacation.

Rev. S. A. Sheard is enjoying a three weeks vacation from his labors as pastor of the M. E. church, a part of which time he will spend with relatives and friends in Racine county. Next Sunday the morning services at the Methodist church will be conducted by Charles Herschleb and in the evening of that day there will be a union meeting conducted by Rev. Fred Staff. On the following Sunday it is expected that Presiding Elder Miller will be here to conduct both the morning and evening services.

Shoes Are Often Deceptive

You think they fit the first day. You know they don't forever after. The proof of a shoe is in the wearing. That is when the tight places begin to rub and pinch.

THE MAKERS OF THE

HANON SHOE

recognize this. They have studied the human foot as carefully as they have the art of good shoe-making.

The result is a shoe that fits all over—that fits first, last and all the time.

This feature of the Hanon shoe has been tried out by hundreds of thousands of people during the last fifty years.

We have your fit in a Hanon in many styles—calf, tan or patent.

JOHNSON & HILL COMPANY.

A Record Session

The legislature adjourned last week after being in session off and on during the past six months. Enough laws were made to satisfy the most particular person, some of which were good laws and some of them not so good. The legislator who went after the office for the pay there was in it was undoubtedly doomed to disappointment, as the salary would not keep a man in the bare necessities of life in a city where they have reduced the fleeing of legislators to a science as they have at Madison. In these days of reform it takes a lot of legislation to satisfy the demands of a great moral state like Wisconsin.

Announcement.

After practicing law for twenty-two years in Grand Rapids, Wisconsin, in 1899 I removed to Milwaukee where I continued the practice of my profession. I have now resumed business in Grand Rapids, where I shall be pleased to meet each old and new clients as may have need of my services.

Geo. I. Williams,
Attorney and Counselor.
Rooms 4 and 5 Wood block, East end of bridge, Telephone 91.

Death of Mrs. Edmund Brown.

The death of Mrs. Edmund Brown took place Friday noon at the home of her parents, Mr. and Mrs. Walter Barnett on the west side, after an illness of not more than a weeks duration. Besides a husband she leaves one infant child to mourn her loss.

The funeral took place Sunday afternoon at 3:30 o'clock from the Methodist church, Rev. Sheard officiating. Interment was made in Forest Hill cemetery.

Went to Kilbourn

A party consisting of F. J. Wood, Guy Wood, Walter Wood, G. M. Hill and Earl Hill took a trip down river last week in Guy Wood's gasoline launch, going as far as the Delta. They returned by train, stopping the boat home in the same manner. It is needless to say that the trip was a pleasant one in every respect.

Attending State Meeting.

Earle Pease, Guy O. Babcock and E. B. Redford, cashiers in the local banks, are in Milwaukee this week attending a session of the Wisconsin State Bankers Association.

NOW OPEN

WONDERLAND ELECTRIC THEATER.

THE "WHY" OF IT

Did you ever wonder why Treadeasy shoes are never sold at a reduced price or found on a bargain counter? One reason is that they are always a bargain at \$3.50 and another because the margin of profit for both the manufacturer and retailer is so small there is no chance for a reduction. You get your money's worth when you buy Treadeasys.

Sold Only By
I. Zimmerman,

Advertisements.

Ladies. Gmied, Mrs. August; Klitz, Mrs. W.; Schluter, Miss Ella; Wolf, Miss Rose.

Gentlemen. Babcock, W. H.; Breneman, Mr.; Chapel, W. D.; Day, John O.; Duncan, James; Ellington, Mr. A.; Edwards, J.; Maunders, Raymond; McLeavy, T. F.; Olds, W. L.; Overbeck, Chas.; Steinfeld, Rae; Wildema, Frank; Younger, Henry.

Advertisements.

The Advertisers have erected several tents across from the Daily property on Baker street and commenced holding meetings in the large tent on Monday. Later in the season it is the intention to hold a camp meeting east of the city such as has been held here other summers.

Bicycle Stolen.

J. R. Linderman lost his bicycle on Tuesday some person stealing the wheel while it was standing in front of his place of business. At the present writing the thief has not been apprehended.

Bull Kills Old Soldier.

Andrew Winegarden, an old soldier from the Wauwata soldier's home, while visiting at the home of his son, while visiting in the town of Maillon Winegarden, in the town of Rome, was attacked by a bull. The animal threw his victim to the ground, breaking his breast bone, several ribs and inflicting internal injuries. The old man suffered until Monday, when death relieved him.

May Build a Warehouse.

At a meeting of the American society of Equity held at Kellner some time ago the members voted to build a potato warehouse at that point this summer. Work has not been started on the structure as yet, but it is expected that it will be begun in the near future.

A ten-dollar bill in the contribution box is passing strange.

You will find out eventually that you will eventually be found out.

It is always a day by accident with her to make a woman change her mind.

The force will always be necessary if only to find out whether the man is a man.

Crumbly growers have organized a trust. It will be a sort of feeder for the turkey trust.

A nice, comfortable sort of wife to have is one who doesn't want to buy you this for you.

Why should anybody commit suicide when it is so easy to meet the fact that makes the fact?

A Washington academic sharp now says that it is healthy to eat green fruit. All boys know that.

Katharine Williams will be glad to get the Carnegie library. It will be a good place to store ammunition in.

Chief Wiley means well, but he really ought to have learned that the only way to make his subordinates like him is to make them like him.

There has been an increase in price, but man has been able to make things out of paper and paper factors instead of having them down on.

John Jacob Astor, of the Automobile Club, is a moving spirit in the organization of the Automobile High Way Improvement association, which is now being effected.

New York residents are married before they are nearly 21. But they don't know that they cannot make the world over, so they are content to settle down and enjoy themselves.

You should handle your best friends like you handle your best friends. The only way to make them like you is to make them like you.

This Japanese are reported to be increasing in stature, measurements showing that they have gained more than an inch during the last generation. However, in addition to the other things they are doing are the Japanese to become giants?

The example of the deuter county, Illinois farmers in organizing a joint protective association is worthy of being followed elsewhere. It has been proved that the only way to make a crop grow is to make it grow.

British Ambassador Rivers is not one of those who believe the great secret is a failure. He has traveled about a lot about our people and has gained our confidence with his understanding and his sense. "The American people have shown ability for self-government greater than any people on earth." And he has that in the opinion of an expert in governments, it has been taken as an exceptionally significant tribute.

Negroes in Florida state on dominoes and often make long journeys. How many of them to obtain these useful animals, or even to exist themselves, beyond European comprehension. The Florida tramp, unlike his countryman, will journey as far as Mexico or Mexico, when he returns, as the proud title of "Haddi" is given to the master, the latter often treats him in a most brutal fashion. When the unfortunate animal needs encouragement a piece of chain is a frequent substitute for a whip.

Judge F. M. Ross, of Arkansas, one of the American delegates to the Hague conference, is regarded as one of the most scholarly lawyers in America. His writings, speeches and public orations, dealing with the subject of jurisprudence in general, but particularly with international relations, have marked him as a man most eminently fitted to uphold American dignity and interests at the conference. He is a Kentuckian by birth, and for the past quarter of a century he has been in the foremost rank of the Arkansas bar.

Enforcement of the imperial decree against the use of opium has begun in China. All opium dens in Peking have been closed, and the closing of the opium dens in other cities is being hastened. The local magistrates to establish hospitals for the reception of poor persons, who will be maintained free of charge and treated for the cure of the opium habit. This is in accordance with the plan outlined last November by the government. In other provinces the results are not as satisfactory, but there has been a perceptible decrease in the use of the drug.

Dom Carlos, king of Portugal, is said to be a royal, sunny-tempered, kind-hearted and generous. He is a man of exceedingly broad-minded and liberal ideas on the subjects of government and of religion, and is happy in his domestic relations.

Mr. Dealey exclaims, "Why, he lives! It won't be long till we'll have to be thankful to the Chinese deacon!" It certainly won't if John keeps on getting ready to enforce his human right to "dual" treatment. And that is all he asks.

The prince regent of Sweden is the most expert tennis player among the royalties of Europe. His enthusiasm for the game has resulted in the construction of the best covered court in Europe, where he engages in matches with any player worthy of his prowess, whether noble or commoner.

The Kaiser objects to modern streets in Berlin and other European cities because they are too long and too regular. He thought he was a sky scraper and little, low buildings in the typical American jumble.

Entirely too many men in this country are doing their courting with a revolver. The ancient and approved weapon of the little god of love is the only one permissible under the rules.

People in a Kentucky town are exasperated because they found minnows in their milk. Did they expect to find black bass? Some folks are too exacting.

PERJURY IS CHARGED

ORCHARD TESTIFIES AGAINST ALLER, HAYWOOD WITNESS.

Evidence of Defense to Show Explosion in Vindicator Mine Was Contradicted.

Battle, Idaho. — Six more witnesses in rebuttal were put on the stand in the Haywood trial by the state Tuesday. Three testified to conditions in the Vindicator mine in 1902 and three to the situation in Colorado during the strike period of 1902 and 1903.

The important witnesses of the day were called to contradict the showing made by witnesses for the defense that there was no reason for the calling out of the mine other than a desire on the part of the mine owners to drive the members of the Western Federation of Miners from the mining district. One witness flatly contradicted the evidence introduced by the defense to show that the explosion at the Vindicator mine was due to an accident.

After is Arraigned. — While the big trial was going on in the district court before Judge Freeman Wood, an interesting offshoot of the case was being heard in the small room used as a court by Justice of the Peace Savage. C. W. Allen, the defendant, was arraigned before the judge for a preliminary hearing.

The principal witness in the perjury hearing was Orchard himself. The prisoner was brought in from the penitentiary in charge of Warden Wilby and a preliminary hearing was held in the courtroom of Judge Wood.

Allen was arraigned before the judge for a preliminary hearing. The principal witness in the perjury hearing was Orchard himself. The prisoner was brought in from the penitentiary in charge of Warden Wilby and a preliminary hearing was held in the courtroom of Judge Wood.

BRavery ON THE GEORGIA

CAPT. M'CREA TELLS INCIDENTS OF THE AWFUL DISASTER.

Courage of Rescuers Who Plunged Unhesitatingly into the Turret—How One Man Died.

Boston. — Capt. Henry McGree, of the Georgia, reported in his cabin Wednesday night that the explosion on the battleship Monday that caused the death of nine men and the injury of 12 others. Said the captain:

"I was on the bridge making the run for the practice. I was taking observations of each turret of the ship at the time. On the bridge I could hear the command from the turret. So I knew when the turret was coming.

"I heard the shout 'Fire,' but there was no shot, and then I saw men running off, and quickly the first burst, that is always the first in readiness when there is firing going on, was made.

"I rushed to the after bridge near the turret to see what was the matter. The water was already being poured into the turret. The boatswain and Midshipman Graves were the way for them men to come to the turret. I told you there was no danger. No man knew what had happened and no man knew what danger he might be facing, but those men never thought of self, or danger. That brave act will live on their records.

"Probably one little act, or rather one great act, of one of the men, prevented a far greater disaster. I don't know his name. He died. He and one other stood by the second gun that had just been loaded. The last powder bag that had been put in was protruding a little from the gun. When he saw the flash, instead of ducking to the ladder to save himself, he went down the ladder to the gun and with the help of the other men got the gun closed before the flames reached the bag. If the flames had touched the bag, but there would have been an awful explosion, for the powder was confined in the gun and would not have escaped as the other gun, but would have exploded. Not a man in the turret would have been left alive, whatever other damage might have been done. That man gave his life for the others.

"I can tell President Roosevelt has inquired about a man that gave his life in closing the turret. The man, I am sure, will be remembered for his deed. I would be very wrong to have a story like that go into the history of the world, but I am sure it will be remembered for his deed.

"I can tell President Roosevelt has inquired about a man that gave his life in closing the turret. The man, I am sure, will be remembered for his deed. I would be very wrong to have a story like that go into the history of the world, but I am sure it will be remembered for his deed.

DEADLY HEAT IN PITTSBURG.

Ten More Persons Succumb—Intense Suffering in Factories.

Pittsburg, Pa.—Ten fatalities due to the intense humidity and oppressive heat wave occurred here Wednesday night. The maximum temperature was 90 degrees. The maximum temperature was 90 degrees. The maximum temperature was 90 degrees.

WATERSPOUT VISITS KANSAS.

Half Million Dollars Damage Done Near Leavenworth.

Leavenworth, Kan.—A waterspout Sunday night caused damage within a radius of 15 miles of Leavenworth estimated at half a million dollars. Nearly six inches of rain fell.

At infan Mo, several hundred head of cattle were drowned and hundreds of acres of wheat were washed into the Missouri river.

All railroads report tracks out of service. The Missouri river is rising rapidly and persons living in the bottoms are taking their stock and other belongings to the hills.

Slain by Girl He Jilted.

Cleveland, O.—Marjette Denmore, 18 years of age, shot and instantly killed a man, who was 20 years of age, on the street Wednesday. They were both students of the same school.

Jealous; Murders Wife.

Fort Smith, Ark.—A. O. Holsten, a well known educator, killed his wife and then cut her throat, letting her instantly. The cause of the murder was jealousy.

Terrible Work of Plague in India.

Lorain, O.—The steamer William M. Mills, one of the largest on the lakes, was launched here Wednesday. The boat is 60½ feet long. It was built for the Western Transit company, of North Tonawanda, N. Y.

British Admiral Killed Dead.

Nagara Falls, Ont.—Admiral John Pearse McLennan, retired, of the British navy, dropped dead on the veranda of the Clifton hotel Wednesday. The admiral was staying at the hotel with his wife and niece.

99 Years for Murder.

St. Louis.—Edward Borgmann, confessed slayer of his aunt, Mrs. Kate Greenfield, who was found dead in her room two months ago, was Tuesday sentenced to 99 years in the penitentiary.

GRINNING IN THE GRAIN

Fertile Brain Has Evolved a New Style of Cradle.

A new cradle has been invented—and by a man. Which latter statement is a deduction—for no up-to-date woman would really ever think of inventing anything as tedious as a cradle.

It is a deduction—for no up-to-date woman would really ever think of inventing anything as tedious as a cradle. It is a deduction—for no up-to-date woman would really ever think of inventing anything as tedious as a cradle.

It is a deduction—for no up-to-date woman would really ever think of inventing anything as tedious as a cradle. It is a deduction—for no up-to-date woman would really ever think of inventing anything as tedious as a cradle.

It is a deduction—for no up-to-date woman would really ever think of inventing anything as tedious as a cradle. It is a deduction—for no up-to-date woman would really ever think of inventing anything as tedious as a cradle.

WOMAN'S BODY IS EXHUMED.

Grave of Mrs. Magill Opened with Great Secrecy.

Clinton, Ill.—The body of Mrs. Magill was exhumed with great secrecy Wednesday night and in the cottage in Woodlawn cemetery the vital organs were removed.

The organs were taken back to Chicago by Drs. Adolph Gehman and J. A. Wessner of the Columbus laboratory. The Chicago men arrived at 9:30 and were taken directly to the morgue, where they found the disinterred corpse and a corps of Clinton coroners.

The Chicago men arrived at 9:30 and were taken directly to the morgue, where they found the disinterred corpse and a corps of Clinton coroners. The Chicago men arrived at 9:30 and were taken directly to the morgue, where they found the disinterred corpse and a corps of Clinton coroners.

MAN AND HIS WAYS.

AMONG CRANBERRY MEN.

CRANBERRY EXPERIMENT STATION NOTES.

By C. H. Hadenberg and G. G. Maile.

Cranberry Experiment Station Notes.

The second brood of the blackhead vineworm has made its appearance, and the worms are now out in numbers, just about a week later than the second brood of the yellowhead. As we expected this second brood of the blackheads is proving itself to be a serious menace, especially on those bogs where the first brood has been left to reach maturity, without any remedial measures having been taken. These growers which have been fighting the first brood more or less successfully need not dread this reappearance of the blackhead to such a great extent. If following has been the remedy employed for the first brood, and has not with success, a second brood will not be numerous enough on those treated areas, to warrant a retooling now, while the vines are in full bloom, with its accompanying danger to the crop. Those who have done so, we would say that now is the time to spray again, for the worms are just making their way to the tips and start feeding on the upper leaves of the upright.

In those cases, where this far nothing has been done to check the ravages of the fireworm, the outlook is not as gloomy as it would seem upon first consideration. From enough, if left to itself this second brood will spread across the meadow with great rapidity, comparable to the march of a devastating army. We have seen cases of this kind last year, where a strip of about five acres was ruined in a few days. But it is just this habit of "marching" which makes it possible to check. As a rule they start from high spots, or alongside a ditch and spread from there inward. The millers themselves do not fly far, but seem to congregate in enormous numbers on small areas, hovering a short distance above the vines just about sunken like no many mosquitoes. And when disturbed during the daytime, the blackhead miller does not fly far, a flight of a few yards is the furthest we have noticed. We may therefore suppose that the eggs are laid in localized areas, and here the hatch in great numbers and spread. This method of working makes it easier to control. If a sharp lookout is kept on its first appearance, the comparatively small areas where the first opening appears in great numbers, can be sprayed with success. If the worms are present in great numbers, spreading across a section from the ditches, we can generally draw a distinct line, beyond which only a few straggling individuals are found. Spraying a strip about six to ten feet wide in advance of this line has been found to check the further spread of the worms.

The millers of what we have provisionally called the "false army worm," (awaiting further identification) have made their appearance and are fairly well in evidence. The moth is not large, measuring only about one inch from tip to tip of the wings when expanded, and orange in color, with two oblique darker bands of that color across the wings. When fresh, the moth is covered with a somewhat brown metallic powder, which soon wears off. The same moth has been bred from a larva found on a plain tree, and it is possible that it is originally a feeder upon those trees, and has invaded the cranberry marshes secondarily. The size of the larva suggests that it is not primarily a cranberry feeder. A number of adults have been put together to induce egg laying, which, at the time of our writing has not yet taken place. The false army worm miller is attracted to tobacco by night.

The most of this cranberry span worm has also emerged from its cocoon, and can be seen flying around in the evenings, or is often heard upon vines walking through the vines in daytime. It is almost pure white, and its wings are broad like those of

a butterfly. While the wings of the smaller moth, such as the fireworm and fruit worm vibrate so rapidly that they cannot be seen while in motion, the wings of the spanworm miller move slowly and can be distinctly seen all during the flight. When alighting it keeps its wings expanded, not folded around or over the body, like the fruit worm and fireworm millers, nor standing up vertically like those of a butterfly.

This miller is also reputedly caught in toiles during the night. Although the fruit worm miller has been out for a couple of weeks its work is not yet apparent. Last year we found the first larvae on the experiment station which showed signs of fruitworm work as early as July 6. It has been suggested that on account of the late blossoming this year, the work of the fruitworm will not be very much in evidence, as the millers did not find any berries to lay their eggs on, and that it is generally the early berries which are destroyed by fruit worm, while the later berries remain free from attack. We would be interested to know if this has been generally noticed. Considering that the millers will be around for a long time yet and egg laying keeps on until far into August, (as evidence by the fact that young fruitworms are found even at picking time) there is plenty of chance yet for the fruitworm miller to get its egg deposited.

The eggs will be found as a rule, just back of one of the small green only leaves, partly concealed by the edge of it, which is slightly curved back toward the leaf. They are very small, flat, round, of a dirty white, and inconspicuous; and can only be found upon the closest examination.

Bog Building by Machinery.
Vernon Courter.

On the estate of A. C. Burrage at South Hanson an automatic truck is being used to assist in the work. This auto-truck is the first of the kind ever built and the following description of it should interest the cranberry growers.

The machine weighs nearly five tons and is fitted with heavy wooden wheels of 12 inch steel tire tread. The wheels are 23 1/2 to 3 feet in diameter.

The car has a 40 horsepower, four-cylinder engine was constructed by the Hewitt Motor Company and has a large livingstone radiator at the front, connected with the engine is oil tank so constructed as to force oil through the whole machine by means of an automatic pump at the front of the engine. The car is 22 feet over all, and is of the regulation width. It is built entirely of heavy wood and fitted with heavy steel trimmings. The driver's seat is located at the front of the big machine, with the engine at the right.

At the rear of the truck is a 12-foot dumping car, 12 inches deep and floored with metal. The dump car has a capacity of about seven tons of sand. The sand is dumped by means of a friction from the flywheel of the engine. This feature was planned by Mr. Watson of the Burrage Company and is a success.

The big auto has been put to work on the building of the dike, but, owing to the wet weather, the part of the dike which was begun by the laborers is not hard enough as yet to make the machine practical in running over it. It is stated by the men who are working on the building of the dike, that owing to the wet weather, the part of the dike which was begun by the laborers is not hard enough as yet to make the machine practical in running over it.

FACTS IN FEW LINES

Gold pens are alloyed with silver to about sixteen carat degrees.

The year 1907 completes a century of Protestant missions in China.

Humming birds range from Cape Horn to as far north as Alaska.

Tugs in the Suez canal tow a vessel from sea to sea in forty-four hours.

The prison population of India is only thirty-eight per 100,000 inhabitants.

Traveling in Spain is not expensive, the cheapest comfortable hotels being only \$1.85 a day.

When the Vatican recently received a thorough cleaning and some repainting was done the work employed 5,700 people.

The daily production of woolen hats in the town of Monza, Italy, is about 150,000. There are fourteen factories, with 7,000 employees.

The Duke of Almonzi named the three children of Mount Rowen-zori after Queen Margherita, Queen Alexandra and King Leopold.

Numberless letters of the Duke of Wellington as prime minister are extant on the covers of which the word "immediate" is written "handwritten."

Hongry, Tonkin, China, has the largest coal mine in the world, more than a mile and a half of a hill which is one solid block of coal about 200 feet high.

The Chinese fish with a net suspended at the end of a bamboo pole. The fisherman, when he desires to raise or lower his net, walks up or down the balance board.

Women of Siam, in Thais, wear a chemise over trousers. A veil covers the face, an opening being made for the eyes, mouth and chin.

From the preface to Bueckler's "Southern Italy" we obtain this remarkable advice: "The traveler should avoid the Neapolitan custom of rejecting fish that are not quite fresh."

There are about 4,000 lakes in Colombia, or South America. Most of them are now isolated. Caves are rarely found among the classes living with hygienic care.

The village of West Rutland, Vt., with its 3,000 inhabitants, probably has more churches in proportion to its size than any other town in New England. There are nine, all of different denominations.

The world has only 10,000,000,000 tons of iron ore available. Of these Germany has twice as many tons as the United States. Russia and France each have 400,000,000 tons more than this country. Our consumption is placed at 35,000,000, which is more than a third of the world's total consumption.

India's walnut is produced in this country at an annual rate of about 35,000,000 feet. The larger portion of it now comes from southwestern Missouri, Arkansas, Oklahoma and Indian Territories, although there is some scattering growth still picked up in Indiana, Ohio, Tennessee and West Virginia.

At one of New York's most select boarding schools for girls some of the pupils have formed a society for the abolition of slang and line themselves 10 cents for every slang word they use. One golden rule has been recently reported at the society's desk in a letter to the society: "Thirty cents—two 'not' and a 'beauty.'"

The improvements to the Suez canal now under way include an increase of depth throughout to thirty-one feet and the bottom width to 128 feet, which will permit an increase of speed of vessels passing through it from six to nine miles an hour. This will enable ships to make the passage through the canal in twelve hours, about six hours less than at present.

Any one who is acquainted with the insect life of Florida will remember the ubiquitous ant, and now comes the alarm sounded in the Entomological news that several varieties of tropical ants have been discovered in Florida and Alabama, being recent introductions. One of these, which is an especially destructive pest, feeds on either vegetable or animal substances.

In France one does not get his telephone service as we do here. First he may make an application for connection and service. For this is paid a fee. Then another payment is made to the state for the use of the wire used in making connections and, lastly, the purchase of the instrument. This last cannot be used by the public unless it bears a government stamp.

The Moderate Language association at its recent New Haven (Conn.) meeting voted to use simplified spelling in the journals of the association and approved the campaign of the spelling board. The Wisconsin Teachers' association has endorsed the simplified spelling board and the action of President Roosevelt in furthering phonetic spelling. At the same time it approved the Roosevelt plan for target practice in the high schools.

Congressman Mann of Chicago is Speaker of the House. He must be there with the first and remain until the close of the session. He occupies an end seat on the right of the main aisle, from which he can promptly catch the speaker's eye in all emergencies for the making of motions that the speaker is steering wrong.

In accordance with the prearranged agreement, the test of moving a light house without taking it apart or dismantling it in any way has recently been accomplished at Ashtabula. The range light, weighing fifty-five tons and standing sixty-five feet high, was placed on a lighter and towed about the harbor distance of 750 feet and then successfully placed on a new site. It was raised by the use of jacks and moved on rollers to and from the lighter. Guy ropes held it in position while moving.

Not Afraid of 'Em.

It was at a spiritualists' meeting, and the medium was nettled because one old fellow in the rear of the hall persisted in dozing through the lecture.

Determined to frighten him into wakefulness the medium stepped from the platform, walked quickly to the dozing man, touched him lightly on the shoulder, and said, in sepulchral tones: "I shall order up the spirit now!"

"That's all right," came the unexpected answer. "Make mine a highball and I'll not the dark again!"

Girl Bawled off Sister.

In some parts of Sicily the birth of a girl is looked upon as such a misfortune that a black flag is hung out to proclaim the sad event. Having to be supported by the family as long as girls are unmarried and being obliged to dowry the bridegroom, they are looked upon as a burden.

Boys and girls are very soon in the supporting and when the time comes for marrying increase the family wealth by bringing home a bride and her dot. The girls live in seclusion and marry at the age of fourteen or sixteen.

CRANMOOR

James Gaynor transacted business at the county seat first of the week. Mrs. Gaynor and Mr. Caldwell drove down to the five p. m. train Monday to meet guests from Pewaukee.

Timothy Foley and wife were recent Nokoska visitors.

Mrs. W. H. Fitch spent Thursday at Grand Rapids on a shopping expedition.

Mrs. Cohn has been entertaining Mesdames Mann and Spler of Wausau. Mrs. Mann returned to her home Monday evening.

S. N. Whitley and wife and Mrs. Coddling enjoyed the hospitality of Mr. and Mrs. P. Clinton at Sunday dinner. Mr. and Mrs. Robt. Rezin also invited were unable to attend.

Mrs. Grace Proctor returned Friday evening after a week's visit with her mother at Bethel.

Mrs. H. F. Whitley entertained at luncheon Monday. Mrs. Cohn and Miss Fitch of Cranmoor, Mesdames Mann and Spler of Wausau and Mrs. Rick of Milwaukee.

Mary Zittel returned Monday noon after a Sunday at home.

Mrs. C. E. Fitch took the train Monday evening for Nokoska and Grand Rapids.

Therewith Farrar and Herman Nolker were callers at the A. E. Bennett home Sunday.

SARATOGA.

Mrs. P. F. Bean and Mrs. John McCarthy of Grand Rapids spent Thursday at M. P. Johnson's.

Marlin Hansen of Chicago spent Saturday and Sunday at home.

Miss Emma Johnson spent last week at Arpin and Port Edwards.

The Lorenz family is entertaining company from Chicago this week.

Miss Clara Johnson will teach in the town of Lincoln this year.

Blueberries are getting ripe but are not very plentiful in this vicinity.

A number of our people attended the show at Grand Rapids Wednesday.

ALTDORF.

There will be another meeting at Vesper Saturday evening to consider further the building of a crematory. The committee appointed at the last meeting will report and stock will also be subscribed for.

Adam Kandert has bought the John Ritz forty.

Mrs. P. Wirtz is visiting her daughter, Mrs. Frank Hozer at Atlanta.

Mr. Hauser has the stone work on his site completed and Jacob Bord is now doing the carpenter work.

The school board has retained Georgia Konkin to teach the school again the coming year.

BIRON.

Ernest Peterson returned unexpectedly to our burg from Two Harbors, Minn., Saturday. He has been employed at that place for some time and expects to return soon.

Miss Tikker of Green Bay spent Friday and Saturday with Mrs. Aug. Kemper and family.

Miss Ruby Waters spent Sunday at her home in Sigel.

Mr. and Mrs. Geo. DeMars and children spent the early part of the week in Rudolph the guests of George Bates and family.

Louis Schueller of Stevens Point, who has been employed in our burg for many months, returned home Sunday.

Miss Mabel Maile is now employed as outting girl in the paper mill.

Miss Lizzie McGrath spent several days last week in your city with relatives.

ADDITIONAL LOCAL.

E. S. Hunkins of Pittsville was in the city yesterday on business.

Atty. R. R. Goggin transacted business in Wausau a few days last week.

Miss Fern Love returned Friday evening from a week's visit with relatives at Milwaukee.

Miss Evelyn Gibson of Stevens Point is a guest at the Louis Ule home this week.

Miss Petronilla Mulroy is spending the summer with relatives at New London and Greenville.

J. P. Horton was in Neenah on Thursday to attend a meeting of Wisconsin State Millers.

Mrs. Harry Rabin and children left last week for an extended visit with relatives at Wausau.

Mrs. W. F. Fisher departed Saturday for a week's visit with relatives at Wild Rose and Appleton.

Mrs. G. Mickelson and daughter of Green Bay are guests at the home of her parents, Mr. and Mrs. Dave Latz Jr.

Mr. and Mrs. J. Hintz of Appleton and Mrs. Graul of Neenah were visiting with Mrs. Rabin for a few days last week.

Miss Gella Burr has been confined to her home with illness since her return from Whitewater where she attended summer school.

A party of young people went to Port Edwards Friday, where they spent the day picnicking. The picnic was given in honor of Miss Della Stoddard.

Milwaukee Free Press.—Miss Helen Minahan, Hyde Park, Ill., was guest of honor at a luncheon given on Friday afternoon by Miss Pauline Alexander, 1625 Grand avenue.

John Farish returned to this city Tuesday morning after spending some time in the west. The family is visiting at Seattle, and will also go to Astoria, before returning to this city.

A. D. Appleberry Barnes, the well known Wausau nurseryman, suffered heavy loss in the wind storm which struck his section several weeks ago. The damage to his orchard is estimated at \$5000.

Barrett Simons was a guest of Mr. and Mrs. C. O. Ohose several days last week. Mr. Simons lived here twenty-six years ago when he was a cook on the river. He is now living in Minnesota and found many changes since he left here.

Mrs. Geo. Basenach and three children of Oshkosh are spending this week at the home of her sisters, Mesdames Martha Heindel and Theo. Gardner. Mr. Basenach is manager of the Oshkosh baseball team and was also in the city Sunday.

A party consisting of Mr. and Mrs. Wm. Reeves, Dr. and Mrs. O. T. Hoopes, Misses Anna and Laura Reeves, Edith Rabin, Mabel Hamilton and Laura Solar of Kaukauna and James Hamilton, returned last week from a week's outing at the Crooked Rift club house.

Young men of to-day who are looking for "soft jobs" or figuring how they may get something for nothing, should ponder well these words of Horace Greeley: "The darkest hour in the history of any young man is when he sits down to study how he can get money without honestly earning it."

Will Granger of Kellner was a pleasant caller at the Tribune office this morning. Mr. Granger reports the potato crop looking first class out Keller way, and says that other crops will also be good, the weather of the past few weeks having been particularly favorable for crops on the sandy soil.

Reports from the colonization commission of the National Polish Alliance are to the effect that the Polish emigration to America is steadily increasing and that nearly 5,000 will come into this state this year to settle permanently. There are approximately 10,000 Polish farmers in this state at the present time and the duties of the alliance is to find homes and farms for the emigrants. The alliance recently formed a colony at Green Bay. After the general national meeting at Baltimore more funds may be appropriated to the alliance commission.

The measure regulating the working hours of railroad trainmen which Senator Robert M. La Follette introduced in the last session of the United States senate is now in force as a law. It provides that train, yard and engine men shall not work more than sixteen hours in twenty-four. They are entitled to at least eight consecutive hours of rest. If a man has completed a sixteen-hour day or run, he is entitled to eight hours rest before being "called" again. This rule is continuous except in emergency cases, such as accidents, washouts or snow-blockades.

The law is national and in effect on all railroads in this country.

The Milwaukee road is making a stringent effort to locate a set of box car thieves and notices have been posted for all conductors, trainmen and secret service men to keep a sharp lookout for thieving on all freight trains.

The most recent cases of thieving which have been called to the attention of the officials of the Milwaukee division of Tomah and New Lisbon, and trainmen on that division have been ordered to keep an especially close watch for the robbers.

Most of the recent robbing there, has been done from cases of meats shipped by Chicago packing houses to points on the division and the road has been called upon to make good the loss.

Free, for Catarrh, just to prove merit, a Trial size Box of Dr. Shoop's Catarrh Remedy. Let me send it now. It is a snow-white, creamy, healing, antiseptic balm. Containing such healing ingredients as Oil Eucalyptus, Thymol, Menthol, etc. It gives instant and lasting relief to Catarrh of the nose, throat, and lungs. Make this prescription and see for yourself what the preparation can and will accomplish. Address Dr. Shoop, Racine, Wis. Large jars 50 cents. Sold by Wood Co. Drug Co., Chicago.

FOR SALE.—My place consisting of 3 acres of land, 10 room house, good barn and 40 head of stock. Make offer if taken at once. Mrs. Mary Hamilton.

AN INSCRIPTION ON A FAN.

(Original.)

My friend Charley keeps in a glass case set up on brackets against a wall in his smoking room at home a paper and bamboo fan. There is nothing about it to indicate that it is of especial value. Indeed, 10 or 15 cents would be a good price for it. It is spread out to show some Chinese characters daubed across its face. It occurred to me that this inscription might have something to do with the case taken in the fan's preservation, and one evening after dinner while in the room where it was I asked Charley if it were not so.

"I should think so," he said, knocking the ashes off his cigar. "It's all in the inscription."

"Well, out with it," I knew by his expression there was a story coming.

"You remember some years ago, before I began, I was obliged to go to China on business. I needed one of the best of business, and a few other points, in going from Nankin to Kiangfeng I met with an adventure. I was on horseback and well armed. Hearing a commotion on the road before me, I spurred on and found a mandarin being robbed by a couple of bandits, who were trying to kill him before taking his money. His wealth was very plain to me, and I rushed among them, I fired at both of the assassins in rapid succession, purposely missing them, since I didn't care to kill any one and probably be delayed by doing so. The robbers ran away, and the mandarin's servants took him back to him. He was the most grateful man you ever saw. Since we couldn't speak the same language, he could only thank me with his eyes, which told his feelings plain enough. He picked up that fan, which during the melee had fallen in the road, shook the dust off it and, taking a writing stick, wrote that inscription across its face, handing the fan to me."

"I supposed that he had written his thanks."

"I tried to have your autograph," I said, though I knew he didn't understand me, and we went on together in silence till we reached the next village, where we parted with many farewells which neither understood. Then I went on alone.

"I heard a great deal about the rising devil, but I didn't suspect it was a premonition of the celebrated Boxer movement then about to break out. Reaching a mission station in a small town, I concluded to remain with the family of Mr. Fisk, its manager, for a few days. On the afternoon of my arrival his daughter Evelyn, a girl of twenty, saw me using the fan. She could read no inscription, of course, and said to me:

"Take care of that fan. Don't lose it as you value your life."

"I asked her why, but at the moment she was called away, and I did not see her for some time. I don't remember whether when I did see her I forgot the matter or not. At any rate, it was very soon after that we heard shrieks up the street. Every one present turned white, knowing that a mob was murdering the Christian converts. The noise came rapidly our way, and Mr. Fisk, his family and servants gathered in the living room in consternation. I got out all my weapons, but Mr. Fisk said he might as well be defenseless as to defend my countrymen, especially as it would be pleasant to them dying without action."

"Nearer came the yell and shrieks till suddenly we saw through the window a gang of enthralled coming, doubtless, to the station. At that moment Evelyn, who had been out, rushed in looking like a ghost."

"The fan!" she cried.

"Where is it?"

"What fan?"

"The one you had yesterday."

"I remembered that it was in my room and from Evelyn's expression I knew that it must have been somewhere, so I ran there and snatched it from a chair and ran back again into the living room. Evelyn pushed me to the door, crying:

"Open it! Hold it up!"

"I did as she directed just in time to face the ugliest gang of fanatics I have ever seen or expect to see. Their leader, an immense man, ax raised above his head, when he caught sight of the letters on the fan, he stopped, lowering his ax, while those behind him seemed to be paralyzed by the inscription. Then the leader, calling for a writing stick, wrote something over our door, and the mob rushed in, yells and shrieks following in its wake."

"They had no sooner started away than, the strain on Evelyn having been relaxed, she fainted, and I caught her in my arms. Laying her on a couch, I went out to look at the Chinaman had written on the door. The characters were the same as those on the fan. When Evelyn awoke she told me their meaning. 'Respect this man and those with him.'"

"The signature was that of a mandarin, Chang Lang, very influential with the Chinese people, since he had been opposed to foreigners."

"We remained silent, under the protection of the fan till we could get away. Mr. Fisk brought his family back to America, and I came with them."

"Knowing," I said, "that Mrs. Charley's first name is Evelyn, I take it that the fan covers a romance as well as having saved your lives."

"In that you are right, but if it hadn't been for the fan we should not have lived for the romance."

ELLSWORTH EMERSON.

I will mail you free, to prove merit, samples of my Dr. Shoop's Restorative, and my Book on either Dyspepsia, The Heart or The Kidneys. Trouble, the Stomach, Heart or Kidneys, are merely symptoms of a deeper ailment. Don't make the common error of treating symptoms only. Result of your ailment and not the Cause. Weak Stomach nerves—the inside nerves—mean stomach weakness, always. Anxious Heart, and Kidneys are well have these nerves, and you inevitably have weak vital organs. Here is where Dr. Shoop's Restorative. It is a snow-white, creamy, healing, antiseptic balm. Containing such healing ingredients as Oil Eucalyptus, Thymol, Menthol, etc. It gives instant and lasting relief to Catarrh of the nose, throat, and lungs. Make this prescription and see for yourself what the preparation can and will accomplish. Address Dr. Shoop, Racine, Wis. Large jars 50 cents. Sold by Wood Co. Drug Co., Chicago.

FOR SALE.—My place consisting of 3 acres of land, 10 room house, good barn and 40 head of stock. Make offer if taken at once. Mrs. Mary Hamilton.

Stocks Fashionable.

After a year of banishment ornamental stock collars are coming in again. One style is of pink net and white ribbon, covering the usual color combination, sewed together by opalescent beads.

Pretty Dress For Girl.

The dress shown is one intended for wear with a separate gumpie and is immensely attractive with its wide berth extending over the sleeves and giving the small wearer a broad shouldered appearance. The turkish cuffs which finish the sleeves are of the same style and are very pleasing. Tucks at either side of the front and

SMALL OTTOMAN DRESS.

back and in the upper part of the skirt provide the necessary fullness, and prove more practical for the somewhat feeble child than a full skirt. The waistband which joins the waist and skirt. Any of the lightweight clothing, pounce or linen may serve for the dress, while lawn, batiste or swiss may fashion the gumpie.

No More Elks' Teeth.

It was decided at the convention of Elks held at Philadelphia last week to discontinue the use of elk's teeth as an emblem of the order. This decision was brought about because the demand became so great for the teeth that they were bringing big prices and it resulted in the slaughter of elk by hunters for the purpose of securing the teeth, leaving the carcasses of the animals to rot where they had been slaughtered.

When the tooth of the elk was first used as an emblem it was never supposed that the demand for them would become so great as to threaten the extermination of the animal, or it is not at all probable that they would have become popular, and the fact of their slaughter was first brought to the notice of the lodge by President Roosevelt. The Elk is one of the noblest animals that roam the American forests, and the order of Elks should favor its protection rather than extermination.

Quick Relief for Asthma Sufferers.

Foley's Kidney and Bladder Pills afford immediate relief to asthma sufferers in the worst stages, and if taken in time will effect a cure. Daily Drug & Jewelry Co.

Judge—You were most brave in capturing the burglar, Frau Weacht, but to insure him so severely was hardly worth of you. Witness—I didn't know he was a burglar at all. I had waited up nearly three hours for my husband and thought the robber was he—Walter Salomonwitz!

MONO-RAIL SYSTEM TO REVOLUTIONIZE RAILROAD TRAVEL

May Relegate Steam Locomotives and Heavy Coaches to the Scrap Heap.

FINANCIAL GIANTS ARE INTERESTED

Men of Millions Stand Ready to Test Practicability of Scheme of Howard Hansel Tunis— Speed of 150 Miles an Hour Is Among Promises Made.

New York—A young mechanical engineer, for a little more than three years, has been studying and analyzing the possibilities of a new type of rail vehicle, the "mono-rail," which he has named after his father, Howard Hansel Tunis.

Recently all the newspapers in the city contained the authoritative announcement that John H. Starin, who has been for many years in the employ of the New York Central, had been selected by the company to test the practicability of the "mono-rail" system.

Formal announcement of the incorporation of the new "mono-rail" company is expected soon to be made in Trenton, and this, it is announced, will be followed in the next four or five weeks by the announcement of a deal by which the new company has acquired a franchise and terminal rights in the two cities—rights presumably owned by some existing company.

ment which constitutes the distinctive feature of the invention of the young inventor, and marks its greatest difference from the other "mono-rail" systems. The overhead truck arrangement, with the four wheels, horizontally set and working on the inside of the overhead tracks, renders the car and gives it its equilibrium. Power is also transmitted from those overhead wires for the operation of the cars.

One of the claims made for the Tunis "mono-rail" is that it is a revolution in the history of railroads. One reason given for this is that the guide wheels on top, which run in the overhead rails, are of cast iron, and are so constructed as to make but little noise. They also have ball bearings and this makes tremendous speed possible. The guide wheels are only eight inches in diameter and less than two inches apart, which contributes to its noiselessness in the use of the direct current motor.

Engineer Tunis claims that the only proper system of railroad construction is the single track, because the double tracks are in opposition to the laws of gravity, and make necessary tremendously heavy cars.

In his car, Tunis explains, the bottom will be but 20 inches above the rail, and thus the center of gravity will be very low. The cars will have an almost perfect equilibrium, even

without being steadied by the overhead arrangement.

Cars Will Be Light.

Then, the cars are to be extremely light as compared with modern railroads—another element contributing to high speed. They will not weigh over seven tons.

Right here, the two points just mentioned, in the great advantage claimed by the backers of Engineer Tunis's system. Mr. Burrows in describing its advantages said that the great sprawling cars of the present, with their immense weight, are theoretically wrong.

"These big heavy cars are in effect houses set upon wheels," he said. "These wheels are placed four feet apart and one-half inch apart, with the center of gravity between them. The first and greatest essential to the whole system is that the cars must be heavy in order to remain on the tracks. These, then, is the whole key to the whole system, and in a system whose only excuse for being is the ability to make speed the principal requisite should be great weight. In short, having to overcome gravitation, they start out by making it impossible. It requires a great mechanical feat to discover that a one-rail track is greatly superior to a two-rail track, if one goes no further than to see that one wheel will only have half the obstacles to overcome that two have."

Economy in Operation.

Still another claim for the mono-rail system is that they can be operated at a much lower cost than the present railroads. According to railroad men, the cost of operating a train is lost in the overhead, swinging motion of cars. The Tunis mono-rail system, it is claimed, has a straight ahead motion, without any swinging.

Nothing will equal the speed claimed for the Tunis "mono-rail" system. One hundred miles an hour is an easy matter, and the cars can be pushed to 160 miles without any difficulty. And, while the cars are going at this speed, it is claimed, that the passengers are barely aware of the fact that they are moving. The jerky, swinging motion of two-rail trains is declared to be entirely absent.

As if all this were not enough to

the building of similar roads all over the United States. The overhead truck system used in the Tunis system is patented.

Much Interest Aroused.

How active interest in "mono-rail" roads is, is shown by the fact that following the announcement of the plans to build the New Jersey line, the promoters of the company have been besieged with inquiries from persons who want to introduce the system in other places. One inquirer was a capitalist who holds the concession for a 40-mile railroad in South America, much of the route of which runs through inaccessible country. The Tunis "mono-rail" is especially adapted for use in a rough country because of the fact that the lightness of the cars makes it possible to operate the trains up almost any reasonable grade.

To all these inquiries the promoters say they have replied that the Tunis "mono-rail" is a system of the new system, or even for money making. Mr. Starin, the leader in the enterprise, has announced that his object is not to make money so much as to put into practical use an invention which he believes to be the coming railroad system of the future.

No Stock to Be Sold.

His hope to have a railroad which will carry people from the city to the country in almost an appreciable space of time, and to give an example to other railroad companies in the good treatment of employees. It is announced that no stock of the new company is to be put on the market, and that the money that is wanted to push the enterprise will be realized by an issue of bonds at the right time. A big Wall Street firm has already agreed to underwrite them.

Expert System to Be Popular.

That they ultimately expect their system to be widely introduced the promoters of the new road do not attempt to conceal. This, they expect, will be a practical demonstration of its success.

Howard Hansel Tunis, the young inventor of the system, is at Jamestown, where he is superintending the running of trains over the experimental half-mile track. Tunis was a much longer track, but it is said that the roller companies of Norfolk were too influential with the position management and he was restricted.

grasped his wrist and proceeded to test his pulse. The beats were 114 to the minute. To court. Statement to the

magistrate:

"Your honor, the normal pulse beat is 72 to the minute. I have known it to drop as low as 64 and go as high as 140. The usual limits are 60 and 120."

"When I arrested this prisoner his pulse was 114. He is a healthy man. He is not excited. There was nothing to increase his pulse except the high rate of speed at which he was going. By careful study I have figured out that a pulse of 114 indicates positively nothing less than 55 miles an hour."

The chauffeur (owner) replied: "Your honor, this officer is fooling you. It is true that my pulse was 114 when he tested it, but it was due to the excitement of the chase he was giving me."

"Ah," quoth the judge. "So it was a hard chase, eh? The officer's wheel was at 63 miles an hour. And you didn't quite succeed in getting away? Fifty dollars, and next time it will be \$100."—N. Y. Press.

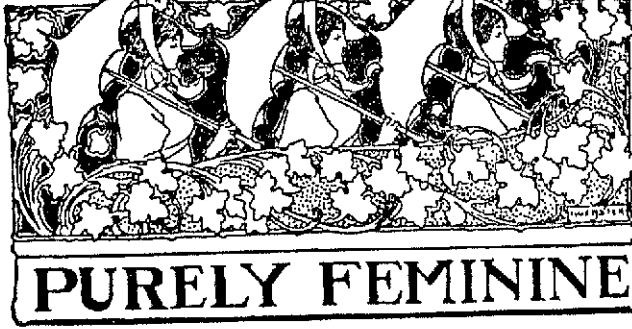

JUDGED BY THE PULSE.

Bicycle Cop with Medical Training Brings Speeders to Terms.

Out in—well, it is best not to say where. To tell all would be to tell the tale. But in Black County, a young doctor got tired of his profession and became a bicycle policeman, riding a "splitting devil" capable of making 63 miles an hour.

He learned years ago that the "quint" that great speed is a healthy man. He is not excited. There was nothing to increase his pulse except the high rate of speed at which he was going. By careful study I have figured out that a pulse of 114 indicates positively nothing less than 55 miles an hour."

His hope to have a railroad which will carry people from the city to the country in almost an appreciable space of time, and to give an example to other railroad companies in the good treatment of employees. It is announced that no stock of the new company is to be put on the market, and that the money that is wanted to push the enterprise will be realized by an issue of bonds at the right time. A big Wall Street firm has already agreed to underwrite them.

PURELY FEMININE

FEUDS IN FAMILIES

SOURCES OF EMBARRASSMENT TO GUESTS.

Temptation to Sympathize with Apparent Victim Is Something to Avoid—Where Diplomacy Is Called For.

Few things are more embarrassing than to find one's self a guest in a domestic household.

One must be gifted with wonderful tact and prudence to be able to avoid taking sides and making remarks which embroil one with all parties, for the matter how much they fight among themselves they are certain to make a common cause against an outsider.

After one has been out a few times they learn not to put their fingers in between the blades of the scissors.

Yet, low prudence is the temptation to sympathize with an apparent victim, and mingle our own indignation with the outbursts of which we are made the confidant.

It may be the wife who is at odds by the conduct of a son-in-law, or the younger sister in a jealous rage against her sister.

Almost surely it is one of the women of the family who pours out an account of her sufferings in the guest's ears.

Men are not above making a break in fast table scenes by a casual allusion to a domestic quarrel.

One finds it safest to express admiration and wonder at the patience and long suffering of the woman who thus craves your sympathy, mingled with courteous little compliments for good qualities in the offending man whom she would be ready to tear your eyes out for sympathy.

After all, diplomacy is the course most nearly approaching justice, for in family feuds there is invariably something to be said in favor of all parties.

A NOVEL FAN BAG.

Provides Against Loss of This Very Useful Article.

The number of lost and strayed fans which are annually found in the ballroom after a dance tells its own tale, and surely points a moral for those who are anxious not to buy a new fan after every party.

Some such little fan bag as the one which we illustrate might save a fan from an untimely end. It would be useful, too, for taking to the theater, or when traveling by train, in evening dress, from the suburbs.

The shape of the bag is so simple that the sketch does not require much explanation.

Effective Color Scheme.

Pale mauve cloth in light weights is popular for gowns to be worn on cool summer days, while an exquisite shade of coral pink and a light blue are also effective. One cloth has come into notice again, for its satin finish and luster make it extremely well adapted to the long, graceful lines that are a feature of this year's styles.

The plain skirts that are so becoming show off the light colors and the colors are not so apt to become soiled as a light and shade that are most artistic in the soft folds. These afternoon gowns for the summer season are in truth a delight to anyone who loves clothes for clothes' sake. They are not the essence of the wardrobe, but they are the essence of being always correctly gowned.

Many Blouse Designs.

As long as coat suits are worn the blouse will be fashionable in one form or another.

This season there are two distinct styles—the tailored and the more elaborate. Both are decidedly feminine, however, even the tailored style having its severity relieved by many of pink and white. A blue and white spider cloth has a wide stripe of shaded blue, light even in its deep tone, alternating with a wide stripe of white, and over all are thrown clusters of little white daisies. It is in the exquisite drawing of the formal dress and in the way in which they are put to meet into the background of standing out clear-cut and distinct that half the effectiveness of these new silk and cotton materials lies.

A genuine muslin washes like the proverbial rag, but, of course, the fine lawn on the painted gowns the care less eye may at a glance take for mere muslin is another story, and must go to the cleaners. Embroidered muslin worked in shaded tones of blue and pink and white, and will wash as well as the plain fabric, and will be as satisfactorily "got up" by a competent laundress.

HEART-SHAPED SHOE POCKET.

Useful Where Absence of Room Is to Be Considered.

The difficult problem of how best to keep one's shoes fresh and free from dust when not actually in use is one which is not very easily solved, especially in the case of a small bed room, where nothing in the shape of an ordinary boot cupboard would take up too much room.

In the accompanying sketch a practical suggestion is given for making a very pretty wall-pocket, specially intended to hold a pair of shoes. This idea, of course, might be enlarged upon, and receptacles provided for two, or even three, pairs, if preferred. The pocket should be made in strong cardboard, covered either with serge or with any odd piece of silk or brocade, bound at the edges with a wide strip of ribbon, and lined with a soft material, such as velvet or plush. A wide loop, with a bow of ribbon to match, should be attached at the top to hang the pocket up against the wall.

ALL IN COLOR SCHEME.

Hats and Gowns Made Brilliant by Contrasting Shades.

Colors in everything once more. Hats are again brilliant in their effect by reason of the color contrast of the flowers or plumes used to trim them. The same rule is observed in dress and indoor gowns. As an example in a gown of Chinese pink in Marquisette, the skirt falling over a thin liberty satin to match. From the knee upwards the skirt is plain, while upon the bottom, just long enough to lie with the skirt, is a band of light blue and white. In the ground, is a delicate piping of coral blue and of that pale exquisite tone which so happily blends with the oriental pink. The same satin is used for bias bottles and for a bias belt drapery. The lace of the bodice and sleeves is dyed to match the pink skirt, the bodice being of the Marquisette, while the skirt of the same place, softly fills up the V's front and back and shows also in an inner sleeve close fitting. Real lace ornaments for the sleeves and a real lace necktie, in cream white shade, to the becomingness—Vogue.

CEMENT DIPPING TANK.

Can Be Cheaply Built and Is Better Than One of Planking.

An excellent dipping tank can be made of cement. It can be built as cheap or cheaper than with boards and is much more durable. We would advise all who are contemplating making any articles of cement, whether it be tanks, posts, sidewalks or anything else to send to the secretary of agriculture, Washington, for farmer's bulletin No. 235.

Dig the hole for the cement dipping tank eight inches longer and wider than the interior of the tank in which the animals will make their exit. The end of the tank from which the animals will make their exit should be slanting, as shown at A in the drawing. After the hole has been dug, mix the mortar at the rate of one part of cement to three parts of sand. Fill in the bottom of the hole with a smooth layer, four inches thick. Leave this till it has dried sufficiently to hold up a man. Then make a box out of inch lumber that is eight inches narrower and four inches shorter than the interior of the hole. This box

should be used in making the three perpendicular sides of the tank, but the slanting side should be left open to be built after the other three walls have dried. When this box is set into the hole, it will leave four inches of the hole, the sides and four inches of the perpendicular end of the box and the walls. Fill in the mortar in this opening and leave till it has sufficiently dried to remove the box. Then the floor on the slant should be made. Start at the bottom and put on a layer of cement four inches thick, allowing it to reach six inches upward on the incline. At the top of this layer, six inches wide, place a piece of 2x2 so that it will extend one inch above the surface of the cement. Then put another layer of cement six inches thick on the sides and four inches thick on the perpendicular end. Continue this till the entire incline has been covered. It is necessary to have the 2x2s imbedded in the cement to afford a foothold for the animal when it attempts to come out of the tank, as cement is very slippery.

In some of the western states, where the stock is naturally dry and very hard, a great many make dipping tanks by simply plastering the interior walls of dirt with two or three coats of cement. Such a method of construction will answer the purpose when none but dogs and sheep are to be dipped, but for the larger animals, there is danger of the cement being broken and the dip wasted. It is much more durable and a great deal cheaper in the end to make four-inch concrete walls and four-inch concrete floors. Usually by placing it at one side of the hog pens, but one side need be fenced, the hog fence serving for the other side.

WEANING PIGS.

How to Handle Them During the Most Critical Period of Their Growth.

The weaning period is the most critical period in the pig's life. Hog raisers make two mistakes in weaning pigs. First, in weaning altogether too early, and second, in not getting them used to eating before weaning. A pig is not in condition to depend altogether on feed from the trough before it is at least ten weeks old. Although it may seem previous to this time that they are not getting much sustenance from their mother, that little habit, however, therefore feed the mother so they will keep up a good flow of milk until the pigs can fully depend on themselves.

All young things have a weak stomach, or putting it in better words, all young animals' stomachs are damaged by early weaning. Hence the necessity of feeding them on feeds that are not filling with bulks, such as are found in barley or oatmeal, says Northwestern Agriculturalist. All grains made into slop should first have these bulks removed and then the slop should be allowed to sour before being fed. There should always be a side trough provided for the little pigs while they are running with their mothers, where they can learn to eat and then they will do much better at weaning time.

At weaning time it can be arranged that the mothers can be removed and the pigs left in their old runs and sleeping and feeding places, they will feed more at home and will not worry nearly so much as when the pigs are taken away and put in strange quarters. They may have to give particular attention to their beds at this critical time.

Don't Shut Her Up.

After a brood sow has had a run on pasture and the weather has grown warm, do not attempt to confine her in a pen at farrowing time. If you do, the probabilities are that she will become feverish and will disappoint you, if not herself. I would rather let her have her liberty and give her some shelter out in the open pasture than to try and confine her in a pen with mother and some rain and sun protection put over her and her young litter, but this will mean more work than shutting her up and you will stand ten times as good a chance of success.

Slow Growth of Sorghum.

Don't be afraid if the sorghum makes a slow growth at first. It grows very slowly for the first month, and for this reason the seed bed should be as free from weeds as possible, before the sorghum seed is put into the ground.

Running a Farm.

It takes time, labor and money to run a farm successfully. In return for the successful farm brings plenty of money for the labor and time to enjoy it.

Small Colony Hog House.

One with Full Length Door and Two Windows Proves Satisfactory.

The sketch shown herewith is of a colony hog house used by a Illinois farmer. It does not differ materially from others that have been published except for the fact that it has a door extending from the base to the top and

two windows on each side. It is built 6 1/2 feet high in front and four feet high in the rear. Bottom is 8x8. The advantage of having a door, says Paul Farmer, is that a man may enter without putting himself to a great deal of inconvenience. Believing that the hogs spend plenty of light windows have been placed on either side of the door.

STOCK NOTES.

Your horse will serve you better if he isn't afraid of you.

Scald the feeding troughs with boiling water two or three times a week. Tumors should be opened with "ripen" and washed with a carbolic acid solution.

Care and feed of the pig from birth to maturity are the secret of success and profit.

Blue vitriol, red lead and nitric acid in equal parts by weight, is an effective dressing for foot-rot.

A well-bred pig in the hands of a poor feeder will soon be a sorry sight. Not a bit of profit in him.

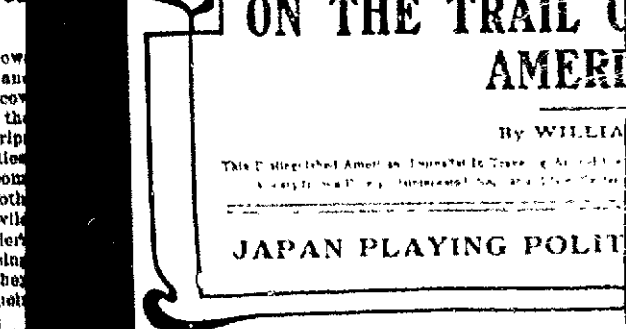

Put bells on the cows if they run in the woods or brush pastures. It will save time in looking for them.

Experienced shepherds say that more tents and more orders are often traceable to rations of a too nitrogenous nature.

No ration has ever been found that will beat clover pasture and corn for fattening hogs. The wise stockman is working the combination for all it is worth.

A Young Sow Each Year.

Some of our best breeders make it a practice to break in a new sow each year, even if they have enough sows to produce all the litters to be raised. The old sows are approaching the time when they will become unproductive, and there must be other sows to take their places. In this way the unprofitable young sows can be tried and eliminated without interfering with the plans of the hog-raiser.

ON THE TRAIL OF AMERICA

JAPAN PLAYING POLITICS

By WILLIAM

Shimizu, Japan. As I have been in Japan for some time, it is necessary to state the results of the recent political conditions and the situation in Japan. I find that the situation in Japan is not what it was a few years ago. The situation is now what it is, and it is not what it was a few years ago.

Grand Rapids Tribune BY DRUM & SUTOR. Grand Rapids, Wis., July 24, 1907. Grand Rapids Tribune. Entered at the Post Office at Grand Rapids, Wis., as second-class mail matter. SUBSCRIPTION RATES. One Year, \$1.50. Six Months, \$1.00. Advertising Rates.—For display matter a flat rate of 10 cents an inch. The columns in the Tribune are 24 inches long, making a column advertisement cost \$2.40 for one insertion. All notices of respect, and all notices of entertainments where an admission fee is charged will be published at 5 cents per line.

Good Roads Without Money.
Direction for Making the Famous King Road
For the benefit of the farmers we reprint the directions for making the road designed by Dr. Ward King, of Maitland, Mo. Mr. King deserves the thanks and encomiums of all dwellers on the dirt roads of the country for his discovery and the generosity with which he places it without money and without price in the hands of any one who will take the trouble to use it.
The problem given is the soft or dirt road. It is "worked" occasionally by being ploughed on each side and the loose dirt thrown up toward the middle making a more or less symmetrical oval sloping to the ditch on either side. In good weather when the rains are not frequent or heavy the ruts will be cut by the wagon traffic. In rainy weather and in the spring and mud holes are full of water and the mud holes are worn into the surface and made deeper by every new wagon track. The water that makes mudholes is held up by the bottom and sides of drier earth or a frozen surface. If the water can run off it will do so. The problem then is to make a smooth surface so that the water will run off. Then of course there will be no mudholes.
The solution is the King drag.
Any man or boy can make a drag in less than two hours.
Get a log eight feet long and twelve inches in diameter. Split it in halves. Bore three two-inch holes in each half—one at each end and one in the middle. Join the halves, split side forward, with good strong braces, about three feet long; wedge them in securely.
If a log is not handy, use a twelve-inch plank. Reinforce the backs with a 2 by 6.
A loose plank on which to ride, is placed across the braces.
Wrap one end of the chain around an end stake, carry it over the top of the end stake, and then down and then back to the other end of the slab where it should be fastened by poking an old post bored three or four inches from the end of the slab and about its center, up and down.
Fitch up and drag—at an angle of forty-five degrees—and you will be surprised at the results.
First make the drag, and have a four-horse team ready for use the first time. Wait until your roads are very soft, the wetter and softer the better. Then attach four horses; straddle the right-hand rut, and begin to drag. Then turn and come back along the other rut. Don't hurry; drive slowly; the slower the better. The effect of this first dragging will be to fill up the ruts, and to make a moderately smooth surface on which it is possible to make three tracks—one on each side, and one where the old track used to be. This smooth surface will shed water partially at least, and will give free access to the quicker than the rough surface of when it begins to dry off, take two horses and go over the same track again. This will still further puddle the clay and carry a little more into the middle of the road which every team will both puddle and compact still more.
If you wish to widen the road, wait until after another rain, and then when it has dried off sufficiently to plow readily plow one furrow along the outer mark of the drag, take the drag and spread this smoothly over the surface of the road. In this way the road will be widened by the width of the furrow and will gradually become oval; that is, higher in the middle, and each time the drag is used, it will become a little smoother and a little harder. If the road is still too narrow, plow another furrow, and so on, until the road has been widened as much as you wish.

OUR COUNTRY CORRESPONDENTS
PITTSVILLE
Mrs. D. A. Campbell and Rev. C. O. Campbell and children, of St. Paul, are here for the summer. Mr. Campbell is here to look after his farm.
Prof. J. T. Sims, president of the Stevens Point normal, has charge of the bank during Mr. Crowley's absence. He was accompanied by Mrs. Sims.
Miss Elizabeth Udell gave a party at her home Monday evening in honor of Miss Charles Spear, of Kilkenny. A fine time is the report of those present.
L. J. Bernbeck and children, of Chicago, are guests at the M. B. Wood home.
Mrs. Willard, of Waukegan, is visiting her sister, Mrs. J. I. Severns. Miss Maude Favell, who has been quite ill for two weeks, is convalescing.
Miss Charles Spear, of Kilkenny, is here on a visit with friends.
E. Sibbey has gone to Appleton on a visit.
Rev. Father Froelich has been sent to Pittsville as pastor of the Catholic church here. He will also hold services at Babcock and Alder, those places being also included in his charge.
A. K. Severns, who has been in the Indian Territory, the past year, came home Saturday for a short visit with relatives.
Chas. Parker is about to open up a saloon in the Campbell building, formerly occupied by J. E. Platts, the restaurant man.
Chas. Fallow and J. E. Crowley started Thursday night on a trip through the west. They expect to be absent a month or six weeks.
Take the Postmaster's Word for It
Mr. F. M. Hamilton, postmaster at Chippewa Falls, has been a stock of merchandise and patent medicines. He says "Chamberlain's Colic, Cholera and Diarrhoea Remedy" is standard here, and that it never fails to give satisfaction and we could hardly afford to be without it." For sale by Daily Drug & Jewelry Co.

NEKOOSA
(From the Times.)
Bert Drake's little daughter accidentally shot herself through the right foot last Thursday while carrying a 22 short rifle from the house to her uncle who was in a boat. The girl did not know the rifle was loaded and in walking along she touched the trigger with the result that the bullet went through her foot, but luckily did not break any bones. Dr. Waters extracted the bullet from the bottom of the foot. At last reports the patient was getting along nicely.
A pretty home wedding occurred here at 9:30 o'clock yesterday morning at the house of the bride's sister, Mrs. J. Guthrie, at which time Rev. M. Luther united in matrimony Miss Martha Rae and Mr. Frank J. McGarrah.
The home was beautifully decorated with ferns, roses and similar, and the ceremony taking place under a horse shoe of flowers and was witnessed by only a few relatives and intimate friends of the contracting parties.
Active steps are to be taken at once in regard to extending the boundary of Nekosia to include the Wood Farm settlement, the people living there desiring to have that territory annexed and made a part of Nekosia.
A census is to be taken and if the population is found to be 1500 or more, the village and annexed territory may be incorporated as a city with three wards, thereby giving Nekosia three representatives on the county board instead of one.
Heretofore, Rev. Father Froelich, pastor of Sacred Heart of Jesus Catholic church, of this city, will have only the local congregation to look after, the Babcock parish being now in charge of Rev. Father Froelich, who will reside at Pittsville as pastor of the church there.
Guy Wood of Grand Rapids, was here on Monday on his way, with a companion to the Delta of Wisconsin. They drove down with a gasoline launch which was put into the river below the Nekosia dam, making their way from here by water.

REMINGTON.
Mrs. Cary, who has been a guest at the Lows home for several months, departed for Dexterville Saturday morning to pack her household goods. From there she will go to Douglas Co. accompanied by her son. She has made many friends during her stay here and we wish them success in their new location.
George Fraser of Tomah was here the fore part of the week visiting old friends.
Mr. and Mrs. Borkoskie have gone to housekeeping at Nekosia.
James Lowe of Tomah is the guest of his son, C. B. Lowe this week.
It is with a feeling of deep regret we learn that Rev. Father Feldman, pastor of Nekosia, will not come to Babcock to hold services after July 28th. His numerous friends around here wish him success in all his undertakings.
The crops in this part of the country are looking well and farmers are busily engaged in getting ready for the fall harvest.
Carl Kottakie is having a new barn erected on his place.

THE TWO CENT RATE.
Portage Democrat.—The democrat fails to see any great cause for the condemnation of the legislature that is now killing the rates of various public utility companies because it passed a two cent fare bill. We are of the opinion that the legislature did just what it ought to have done. Notwithstanding the rate commission claimed that a two and one-half cent fare was justifiable. The rate commission of Wisconsin is no more liable to be correct than the legislature, the power that created the commission. Other states surrounding Wisconsin have a flat two cent rate. If that is a sufficient rate in Iowa, Nebraska, Illinois and other places, why should Wisconsin travelers pay more. A two-cent or less fare is bound to prevail in all states, so why prolong the agony of the man who has to travel, simply to uphold the dignity of a railway? The rate commission is a higher rate than the rate commission of any other state. The public demanded a two cent fare when the Wisconsin commission compromised with the railroads on a two and one-half cent rate and the legislature, notwithstanding the clamor of the party press and railroad agents, have given the people what they want and to what we believe they are entitled and the governor in signing the two cent law has done the right thing.
Better Stick to Wisconsin.
The oldest inhabitants cannot remember when there was a crop failure in Wisconsin; sometimes the harvest in certain lines may be light compared to a bumper crop, but there is never a complete failure due to drought and other causes such as has happened more than once to the Dakotas, Nebraska and other western districts. Some of the older residents will recall the movement of settlers to the west and how they came back to Wisconsin again. History may repeat itself. The Wisconsin residents who are wise will remain where crops are sure.—Appleton Crescent.

Was in Poor Health for Years.
Ira W. Kelley, of Mansfield, Pa., writes: "I was in poor health for two years, suffering from kidney and bladder trouble, and after consulting the money consulting physicians without obtaining any marked benefit, but was cured by Foley's Kidney Cure, and I desire to add my testimony that it was the cause of restoring the health of others." Refuse substitutes. Daily Drug & Jewelry.

Best Medicine in the World for Colic and Diarrhoea.
"I and Chamberlain's Colic, Cholera and Diarrhoea Remedy to be the best remedy in the world," says Mr. C. L. Carter of Skirmish, Ala. "I am subject to colic and diarrhoea. Last spring it seized me as though I would die, and I think I would if I hadn't taken Chamberlain's Colic, Cholera and Diarrhoea Remedy. I haven't been troubled with it since until this week, when I had a very severe attack and took half a bottle of the twenty-cent size of Chamberlain's Colic, Cholera and Diarrhoea Remedy, and this morning I feel like a new man." For sale by Daily Drug & Jewelry Co.

WANT COLUMN.
ADVERTISEMENTS will be published in this column at the rate of one cent a word, per day. For less than this rate, if you want to buy, sell or trade anything, try the want column. It is a waste of time and of money as well as your back aches or is weak, if the urine is red, or is dark and strong, if you have symptoms of Bright's or other diseases, or dangerous kidney disease, try Dr. Shoop's Restorative. It is a medicine of liquid and not a pill, and will do for you. Prescriptions recommended and put.

Monroe—A warrant charging him with abandonment and non-support was issued by Justice J. J. Sullivan for the arrest of W. T. Sauerman, of this city. The complaint was made by Mrs. Martha Sauerman, the defendant's wife, before District Attorney M. G. Rath, and will be served on Justice Sullivan and his wife. The abandonment was alleged to have taken place on June 24. This is the second time the defendant has been charged with the same offense. The first charge was made in the fall of 1914. The defendant is now in jail.

Man Arrested at Racine While Stealing Fancy Riding Feats.
Racine—James Rankin, 28 years old, a resident of Racine, was arrested at Racine while stealing a horse from the stable of a local farmer. Rankin was taken to the Racine police station and is now in jail. He is charged with larceny of a horse.

WANTS TO PAY BACK \$250,000.
Milwaukee—Henry Herman wants to pay back to Milwaukee \$250,000. He is a resident of Milwaukee and is a member of the Milwaukee Athletic Club. He is now in jail, charged with larceny of a horse.

Old Light Keeper to Retire.
Kenosha—The old light keeper at Kenosha, who has been in the service of the city for 35 years, is about to retire. He is a well-known figure in the community and has been a member of the city council for many years.

Trick Suicide at Wife's Grave.
Milwaukee—A man who was known as a trickster, committed suicide at his wife's grave. He was found lying on the ground near the grave, and was taken to the hospital, where he died.

Makes Great Find of Ore.
Plymouth—A man who was known as a trickster, made a great find of ore. He was found with a large quantity of ore, and was taken to the hospital, where he died.
